This request is in support of the FY09 President's Budget Request for \$22.356 million to construct a new middle school in the Northern Training Area at Fort Bragg, North Carolina. A new middle school is required to accommodate enrollment increases due to new housing being built for the Army's Residential Communities Initiative program. The Family Housing Construction program will construct additional new housing units and upsize most of the existing units to 4 or 5 bedrooms at Ft. Bragg, resulting in an influx of approximately 550 students (6th through 8th grade) above present capacity. The community schools at Fort Bragg have a current enrollment of 4,517 students. As a result of new housing being added to the main cantonment area, the schools are projected to be filled to capacity. The additional 1,524 family housing units being constructed in the Northern Training Area will require a 550 student middle school to be constructed to serve the housing area. Existing schools in the main cantonment area were constructed based on outdated Department of Education and state standards, resulting in undersized classrooms, administrative, and other areas. Adding additional students beyond maximum capacity will adversely affect the quality of the educational programs and greatly limit the number of educational programs offered to students. With the NTA being separated from the main cantonment area this new school is also needed to cut down on student bussing and associated costs to both the school district and parents. The influx of students resulting from the Army's Residential Communities Initiative program cannot be supported within current district capacity. New construction is the only method of obtaining the space needed to accommodate the enrollment projected to arrive within the next 3 years. Without this additional capacity, the Army's Residential Communities Initiative program and student education at Fort Bragg would be adversely affected.

This request is in support of the FY09 President's Budget Request for \$20.5 million to Construct a Standard Training Support Center (TSC). Existing substandard warehouse buildings do not have additional capacity to support increased training aids and devices. This project is needed to ensure Fort Bragg can protect its training devices from the environ-

ment and the weather. Otherwise they are facing drastically reduced useful life.
